

WHO WE ARE

We are a team of highly experienced consultants dedicated to empowering, encouraging, and inspiring mission-driven organizations and individuals working to make a cultural impact by affecting progressive change in areas of animal welfare, social justice, environmental crisis, and education reform.

OUR SERVICES

Our specialized consultation services focus on the needs of individual organizations – and individuals within organizations. We believe organizations do their best work when the personal missions and values of the stakeholders and organization are in alignment, and when those whose efforts given in service of the organization can bring their authentic selves to work, remaining engaged, resilient, and dedicated to mission success.

OUR APPROACH

DATA-INFORMED

We support organizations' efforts to innovate and grow by offering our recommendations within the constructs of a scientific framework. We know that data is an invaluable tool when utilized within robust collection and analysis systems. JVR Shelter Strategies integrates best practices and scientific data with 30+ years of experiential knowledge in leadership, operations, and veterinary medicine to examine complex problems within operational systems. We will help your organization make conscious and informed decisions by turning the right data into actionable insights.

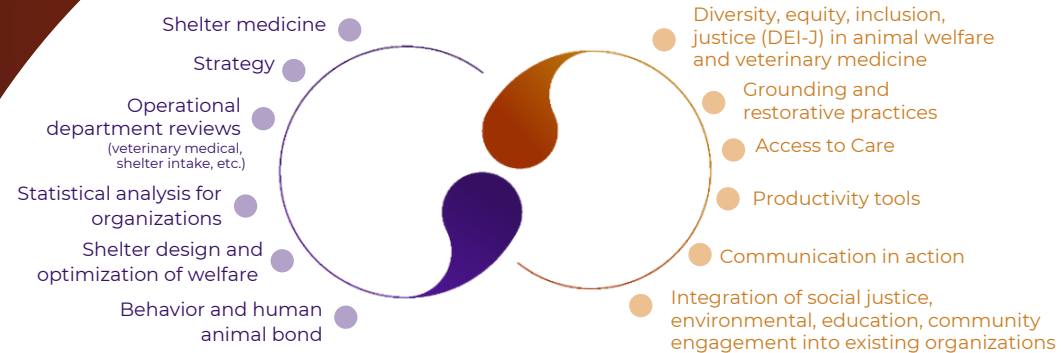

TRAUMA-INFORMED

We recognize the pervasive nature of trauma in mission-driven work and the toll it takes on individuals and organizations that have suffered from chronic trauma. JVR Shelter Strategies roots our teaching in trauma-sensitive mindfulness practices and our DEI-J (diversity, equity, inclusion, justice) work, which aims to avoid triggers and overwhelm while creating space to practice grounding and increase capacity for remaining engaged and authentic.

AWARENESS-BASED

Our organization values our spiritual connection to everything around us: from humans to the non-human animals entrusted to us, the nature that surrounds us to the communities we live in, and to our planet as a whole. We aim to reduce suffering in the world through our engagement with individuals and organizations.

KEY FOCUS AREAS

TYPES OF ENGAGEMENTS

We will work with you to create a customizable solution to meet your needs.
